New from the leader in Dairy Liner Technology

IMPULSE™

THE ANTI-TWIST, HIGH PERFORMANCE TRIANGULAR SHELL-LINER SYSTEM

Introducing IMPULSE, the latest evolution from Milk-Rite, the leader in Dairy Liner technology. The IMPULSE system combines a revolutionary new shell design with an anti-twist, interlocking triangular liner. This system delivers enhanced performance through minimal air evacuation. This promotes the liner to open and close faster, and results in longer milk and rest phases. IMPULSE liners are also available in standard life (IP1) and extended life (IP2) models.

The diagram illustrates the IMPULSE liner system components and its performance. On the left, a hand is shown holding a liner. A circular inset shows the 'Triangular Shell Interior Reduces Air Volume for Faster Opening and Closing of Liner'. A vertical view of the liner shows the 'Locking Anti-Twist Feature' and the 'Impact Resistant Shell'. A side view shows 'Improved Slippage Control'. On the right, a graph plots 'Vacuum' against time, showing 'Longer Milk and Rest Phases'. The graph indicates 'Working Vacuum 4 kPa' and 'Atmospheric Pressure 4 kPa'. The phases are labeled 'Short' and 'Long'.
